Simplified Processing Station (SPS) Overseas Siting

1. Our 022125Z Mar 79 message (Attachment 2) requested site surveys at  
message - Attachment 3) provided permission to conduct a low profile, un-  
obtrusive survey at b1

2. HQ ADCOM Site Survey team evaluated b1 (8-12 Nov 79) and b1  
(13-15 Nov 79) as potential locations for the SPS overseas siting. The message  
at Attachment 1 is a proposed initial results of this evaluation to the Air  
Staff. It contains the following information and requests:

a. b1 does not meet the minimum operational requirements b1  
For  
this reason, b1 will not be considered as a potential location for the SPS  
overseas siting.

b. b1 has two potential locations. The primary location is the  
present site b1 This location  
provides an administrative facility, source of power and hardened surface for the SPS  
equipment. This location would greatly reduce site preparation costs. A waiver  
for the physical security requirement of 100 ft from the perimeter fence  
to the priority "A" fence would be required. The secondary location would meet the  
physical security requirements, but it would require some fill and grading and  
new construction of all the necessary facilities.

Both locations at b1 cannot be supported by the present communications without  
significant presumption; however, there is a proposal to upgrade the communications  
at b1

c. Request HQ USAF provide approval to proceed with b1 as the  
primary location for the SPS overseas siting.

1979  
Item 67(  
(244)

3. Following JCS coordination, A/CP will sign the proposed message as Attachment 1.
